EXPERIENCE

Square – Senior Software Engineer

May 2017 – January 2022 (4yr 9mo)

- ▶ Worked across the stack (Rails, Java backends) with main focus on frontend (TypeScript) to build features for Square's Team Management product
- ▶ As eng. squad leader, shipped projects in coordination with management, product, and design
- ▶ Contributed to team growth through mentoring as well as onboarding new members

Lending Club – Associate Software Engineer

February 2016 – April 2017 (1yr 3mo)

- ▶ Built frontend and backend (JavaScript, Node.js) for Purchase Finance team
- ▶ Spearheaded refactoring effort for loan application flow of yts-learning.com
- ▶ Contributed to internal frameworks

EDUCATION

App Academy – Web Development

Summer 2015

- ▶ Immersive software development course with focus on web dev and agile methodologies
- ▶ Strong emphasis on code quality and design patterns
- ▶ Highly competitive (< 5% acceptance rate)

Dartmouth College – Bachelor of Arts

Fall 2011 – Spring 2015

- ▶ Physics major with Engineering minor, Cum Laude
- ▶ Coursework included: Statistical Methods in Engineering, Linear Algebra, Abstract Algebra, Differential Equations, Digital Electronics, Introduction to Scientific Computing

PROJECTS

Square Team App (Ember.js, TypeScript, Cordova)

[App Store](#)

Mobile app to give employees control of their scheduled hours and insight into their pay

- ▶ Enabled launch to new customer segment, which doubled usage to >150k weekly active users
- ▶ Rearchitected codebase to establish clear lines of ownership across multiple teams
- ▶ Coordinated knowledge sharing and transition as my team assumed ownership of the app
- ▶ Instituted practices to improve code quality: linting; testing; incremental adoption of TypeScript

Scheduling empowerment for team members of Square sellers

[Support Page](#)

Tools for employees to manage their own scheduled shifts while reducing workload for managers

- ▶ Led a team of 4 to build features for users to swap shifts, claim open shifts, request time off
- ▶ Participated in full development lifecycle: feedback to product/design, estimates, planning, development, cross-stack engineering coordination, testing, launch, iteration

SKILLS

TypeScript
HTML

JavaScript
CSS

Node.js
Rails

Ember.js
